

# SLOGAN HERE

More stuff about us a whole paragraph of stuff more stuff filler text you get it this is taking so long but the paragraph will probably be longer and it doesn't look very nice right now make it longer filler filler filler.

## OUR MISSION

I/O LABS is a provincially incorporated, non-profit organization dedicated to assisting youth in accessing impactful STEM education and opportunities. We raise funds to ensure our programs are always free and focus on authentic engagement with underrepresented communities.

## WHAT WE DO

I/O LABS is a youth driven organization that aims to foster STEM accessibility, proficiency and engagement through its Advocacy Lab, Education Lab, Events Lab, and Opportunities Lab.

## Advocacy Lab

We work with community groups to understand and address the barriers faced by under-served populations to STEM educational programming and other opportunities.

We initiate projects that focus on improving the accessibility, and the relevance and design of these programs and opportunities.

We collaborate with educational institutions on projects that aim to create systemic change.
